Getting your annual flu vaccine always beats the alternative, and as an Oxford Member, you’re completely covered.*

As we head into the fall and winter seasons, getting your annual influenza vaccine and a pneumonia (pneumococcal) vaccination, when appropriate, is important for your health. That’s why Oxford offers both vaccines at no cost to Oxford Medicare Advantage® Members*.

Medical studies** show that a preventive flu vaccination*** reduces the chance of infection and lessens the severity of symptoms, even if you do get the flu. Studies also show that a pneumococcal vaccination protects you from getting pneumonia, which can lead to a serious infection in the blood or brain that can cause dangerous health problems. Vaccinations are especially important for older adults and people with chronic conditions, such as heart disease and diabetes.

Start preparing now to stay healthy this season. Call your doctor today and make an appointment to discuss the benefits of vaccination. We’ve enclosed a handy Vaccination Card for you to bring along to the doctor’s office.

*Some plans require copayments, deductibles and coinsurance. Please check your Summary of Benefits or Evidence of Coverage for more information. If additional services are received during a visit, a copayment may apply. **Centers for Disease Control and Prevention. ***However, if you are allergic to eggs, you should not get a flu shot.
